

Have a look at the phone screens showing various kinds of **apps**.
Do you know these **apps**? What are they used for?
Do you use any of these **applications**?

Listen to four speakers talking about their lifestyles and match the speakers to the phone screens.

Lars

Clara

Sienna

Hugo

Answer the questions with the speakers' **names**:

1. Whose academic work is sometimes supported by an artificial intelligence tool that acts like a digital teacher?
2. Whom is the speaker referring to when they mention buying second-hand items on a digital marketplace?
3. Whose morning routine involves a running app created by a well-known international sports brand?
4. Who finds themselves playing a simple, addictive matching game while traveling on public transport?
5. Whose work life involves spending a significant amount of time on video calls with a blue icon?
6. Who prefers to use digital flashcards rather than paper materials when studying for their exams?
7. Whom does the speaker contact using a green messaging app to stay in touch with relatives abroad?
8. Who uses a specific version of a popular video site to keep their children entertained?

What does your home screen look like?
What apps do you use the most?

Viki & Cristina in Barcelona

ChatGPT ●

Google Maps ●

Apple Pay ●

Uber Eats ●

Bank of America ●

Google Translate ●

Read about the adventures of Viki and Cristina and match the apps to the pictures.

- Do you think the girls are having a good time?
- Do you use any phone apps for these daily situations?

What do you think **appification** means? (choose a, b, or c)

- The process of deleting unnecessary applications from a smartphone to save battery life and storage space.
- The transition where many activities we used to do on websites or in person are now done through mobile apps.
- The habit of downloading a large number of applications to your phone but never actually opening or using them.

Do you see **appification** as a benefit of modern life? How **appified** is your life?

App Strategy Adoption by Global Business

Read the facts and fill in the numbers, then listen to a podcast and check.

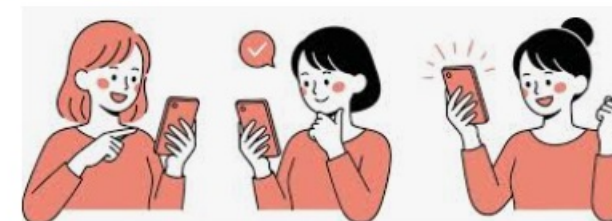

An average smartphone has ____+ apps installed on it.
 An average person uses ____ apps a day.
 Mobile users check their phones more than ____ times a day.
 The Apple App Store has about ____ million apps.
 Google Play has about ____ million apps.
 The average monthly app subscription price is about \$____.

Gerald Collier

1. Why do companies send push notifications?
2. How does Starbucks make customers return?
3. Why is ordering pizza on an app convenient?
4. Which apps are useful without an internet?
5. How does Apple Pay help people buy groceries?

Watch two shorts.

- What are the main concerns people have with apps?
- Do you agree with them? Why? Why not?

YouTube

@Tweedle_Gee They're selling your data for profits.

@johnpine9945 Don't use a touch phone = Don't buy

@TOKetheSMOKE So if your phone happened to be dead than you couldn't start your car?

@FLUFFYJOE13 I'm not even thirty and this is totally me

@captainmorgan2307 App + account + forgot email password + reset email = 15 mins longer than using a key

Can you identify the most common annoyances people have with apps?
