

Traditional Drinks of the World

Japan

Russia

Argentina

Malaysia

Turkey

USA

Bolivia

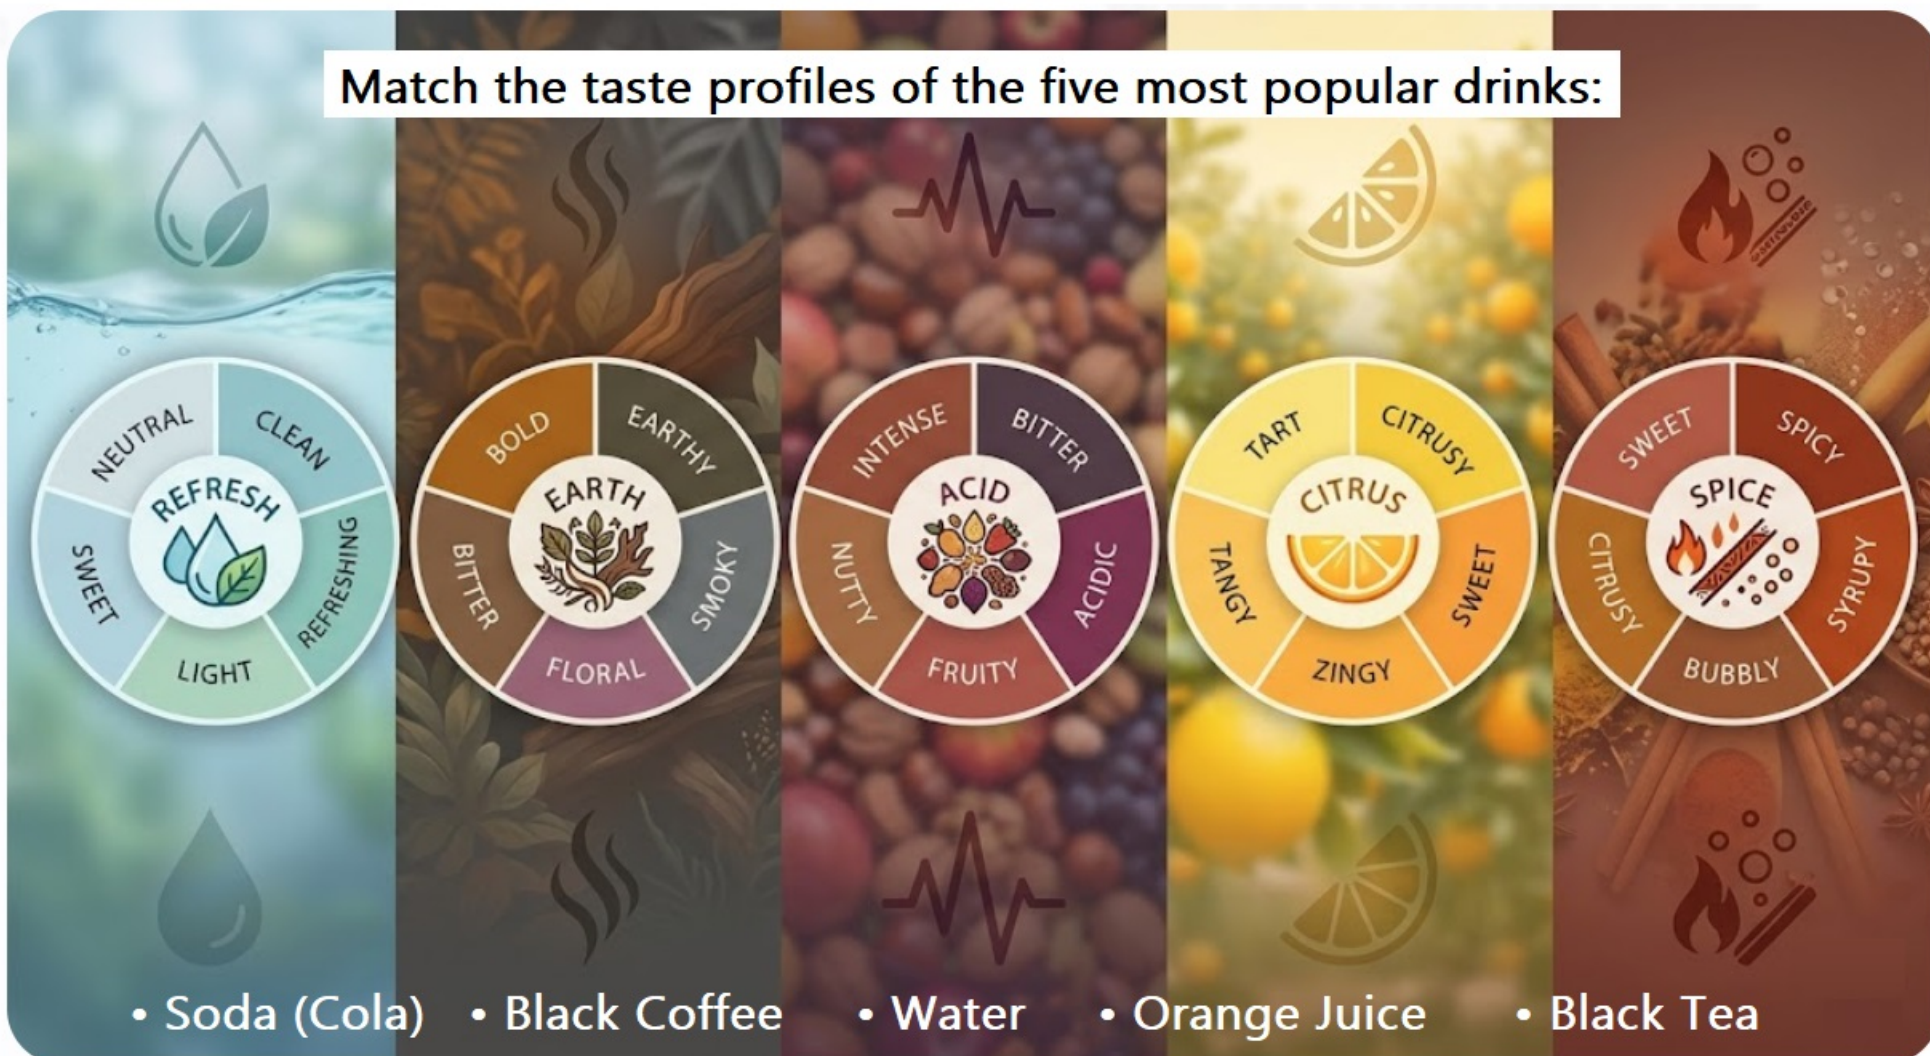

India

Taiwan

Match traditional drinks with the countries they are popular in.
Have you tried all of them? What's your favorite?

Match the taste profiles of the five most popular drinks:

- What do you usually drink in the morning, afternoon, and evening?

- Do you drink for taste, effect, or health reasons?

- Are you a coffee drinker?
What's your favorite type of coffee?

WHAT DOES YOUR FAVORITE COFFEE SAY ABOUT YOUR PERSONALITY?

RECENTLY, A STUDY CONDUCTED THAT EXAMINED THE HABITS OF 1,000 COFFEE DRINKERS. THE SURVEY ASSESSED WHAT TYPES OF COFFEE PEOPLE TYPICALLY DRANK AND ASSOCIATED THOSE HABITS WITH NUMEROUS PSYCHOLOGICAL STYLES AN PERSONALITY TRAITS, THIS IS WHAT THEY FOUND.

THE BLACK COFFEE DRINKER

- STRAIGHTFORWARD
- LIKES TO KEEP THINGS SIMPLE
- QUIET, BUT MOODY
- ALL ABOUT MINIMALISM

THE ESPRESSO DRINKER

- TAKES ON LEADERSHIP
- HARD-WORKING, BUT MOODY
- KNOWS HOW TO GET WHAT THEY WANT

THE LATTE DRINKER

- TENDS TO BE NEUROTIC
- LIKES TO PLEASE PEOPLE
- OFTEN INDECISIVE WHEN IT COMES TO MAKING DECISIONS

THE CAPPUCCINO DRINKER

- OBSESSIVE AND CONTROLLING
- CREATIVE, HONEST, AND MOTIVATED
- MAKES EXCELLENT FRIENDS, BUT GETS BORED WITH UNIMAGINATIVE PEOPLE

THE FRAPPUCCINO DRINKER

- WILL TRY ANYTHING ONCE
- TREND SETTER
- ADVENTUROUS AND COURAGEOUS
- DOES NOT MAKE HEALTHY CHOICES

THE INSTANT COFFEE DRINKER

- CHEERFUL AND OPTIMISTIC
- LAID BACK
- TENDS TO PUT THINGS OFF

THE SOYMILK DRINKER

- HIGH-MAINTENANCE
- DETAIL-ORIENTED
- SELF-RIGHTEOUS AND SELF-CENTERED

Look at the chart, read it through, and match the red-circled terms to the explanations on the bottom right.

Listen to four speakers discussing the chart.

- Which person is which type of drinker?

- Which points in the description do they agree on and disagree with?

Which type of coffee drinker are you?
Does the description match your personality?

- _____ Someone who is difficult to please and needs a lot of attention.
- _____ A person who worries a lot and gets stressed about small things.
- _____ Someone who only thinks about themselves and ignores others.
- _____ A person who is always honest and says exactly what they think.
- _____ Someone who finds it very difficult and slow to make a choice.
- _____ Someone who starts a new fashion that other people quickly copy.
- _____ Someone who is very relaxed and does not get worried or upset.
- _____ A person who cannot stop thinking about or focusing on one thing.
- _____ A person who believes their own ideas are always better.
- _____ A person who waits until the last minute to do their work.
- _____ Someone whose feelings change quickly from happy to sad.
- _____ A person who is brave and willing to do things that are scary.

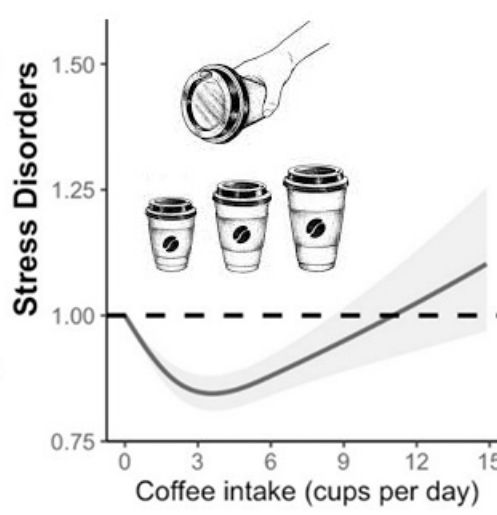

- How many cups of coffee do you drink a day?
 - Have you noticed any effect on your mood and energy levels?
- Read an article. How does it change your perception of coffee drinking?

The Sweet Spot: Can Coffee Lower Stress?
 A massive new study from 2026 has found that your morning cup of coffee might do more than just wake you up - it could actually protect your mental health. Researchers in China studied over **460,000 people** for more than **13 years** to see how coffee affects mood.

The Key Finding: Two to Three Cups
 The study discovered a "sweet spot" for coffee drinkers. People who drank two to three cups a day had the **lowest risk of developing anxiety or depression**. Interestingly, this was true for all types of coffee: Ground coffee, Instant coffee, Decaffeinated (no caffeine)

The J-Shaped Result
 Scientists call this a "J-shaped" relationship. This means: **too little:** People who drank no coffee had a higher risk of stress.
just right: Two to three cups lowered the risk.
too much: Drinking five or more cups a day actually increased the risk of mood disorders. It is possible to "overdo the buzz."

Why does it work?
 Coffee contains special natural compounds. Researchers believe these ingredients help calm the brain and reduce inflammation (swelling) in areas linked to stress. While more research is needed to prove that coffee is the direct cause, the results are a positive sign for coffee lovers.

- Look at the list of ideas and pick **five** that make a great cup of coffee in your opinion.
 Watch the video to check your answers. Answer the qs below:
1. What does James say coffee tasting has **in common with** music?
 2. How does the **olfactory bulb** contribute to coffee flavor?
 3. What makes a coffee's **mouthfeel** pleasant according to James?
 4. Why do different people **perceive** the same coffee differently?
 5. What feeling does James describe after finishing a great cup?
 6. Why does James **look forward to** coffee the night before bed?

- **Aftertaste persistence** (lingering pleasant notes)
- **Pleasant mouthfeel** (no harshness; light or creamy)
- **Clean brewing equipment** (prevents off-tastes)
- **Absence of defects** (no sourness or astringency)
- **Optimal grind size** (matches brew method)
- **Clarity of flavor** (crisp, not muddy)
- **Water quality** (filtered, pure)
- **Balance** (bitterness, sweetness, acidity in harmony)
- **Personal resonance** (evokes joy or nostalgia)
- **Freshness of beans** (recently roasted)
- **Precise water temperature** (90-96°C)
- **Aromas** (distinct flavors in the brain)
- **Consistent brew ratio** (e.g., 1:16)
- **Body and texture** (silky, velvety)
- **Leaves you wanting more** (anticipation for next cup)

Do you agree with the points James makes? Why not?
