

- Involuntary spasms of the diaphragm followed by sudden closure of the vocal cords.
- A low, mournful sound uttered in response to pain, effort, or annoyance.
- A long, deep, audible exhale expressing relief, sadness, or fatigue.
- The audible release of digestive gases from the rectum.
- The release of gas from the digestive tract through the mouth.
- The rhythmic sound of teeth grinding food, often accompanied by lip-smacking.
- A sudden, forceful expulsion of air from the lungs to clear the throat or airways.
- An involuntary inhalation with a wide-open mouth, often associated with tiredness.
- A convulsive expulsion of air from the nose and mouth due to irritation.
- Loud, rattling, or thunder-like noises made during sleep when breathing is obstructed.

- Which sounds do you find the most **annoying**? Why?
- Are there any sounds you find particularly **embarrassing** to make in public?
- Which of these sounds is the hardest to suppress when you are trying to be quiet?
- Do you believe certain sounds, like yawning or coughing, are actually "**contagious**"?
- Is there a specific sound from this list that you find oddly **satisfying** or relaxing to hear?
- Which sound is the most difficult to describe to someone who has never heard it?
- Do you have any personal "**remedies**" for stopping sounds like hiccuping or coughing?

Which sounds make you cringe the most?

@lunarthedutchieuwu577

Wait you left out my brother

@ch0colat_831

9 hours of a baby screaming in A plane beside you... I experienced that 😭 xD

@govindgaur9726

where's the sound of Justin bieber

@thequaixel9571

I wish my dad snores like that I'm trying to sleep he's fricking snoring louder than anything in the world

@waynecarversr6375

The baby/child that won't stop crying is the only one that will make me leave the room.

@bingxunn

MUSIC TO MY EARS

@alishavargas4724

Omg nails on blackboard he'll no that's my biggest nightmare lol 😂

mySleep by ResMed 20 INTERESTING FACTS TO KNOW ABOUT SNORING AND OSA

There are **15 million** snorers in the UK

10.5 million men and 4.5 million women

The 3 main reasons for snoring

Snorers are **3 times** more likely to suffer **adverse health conditions** than **non-snorers**

Bed partners of snorers visit their GP more frequently than bed partners of non-snorers

SNORING IS **COMMON** BUT IT IS NOT **NORMAL**

Snoring can be a sign of more serious health problems such as **Obstructive Sleep Apnoea (OSA)**

Sleep **quality** rather than **quantity** is more of an issue
Poor sleep quality exacerbates poor health

>1.5m IT IS ESTIMATED OVER 1.5 MILLION PEOPLE IN THE UK **SUFFER FROM OSA**

The louder you snore, the more likely you are to be **overweight**

More than **50% of patients** with **Obstructive Sleep Apnoea (OSA)** have **high blood pressure** whereas only **25% of patients** with high blood pressure have OSA

SLEEP LOSS AFFECTS NEWLY LEARNED SKILLS MORE THAN WELL KNOWN SKILLS

Over one **third of couples** report **disharmony** within the relationship due to snoring

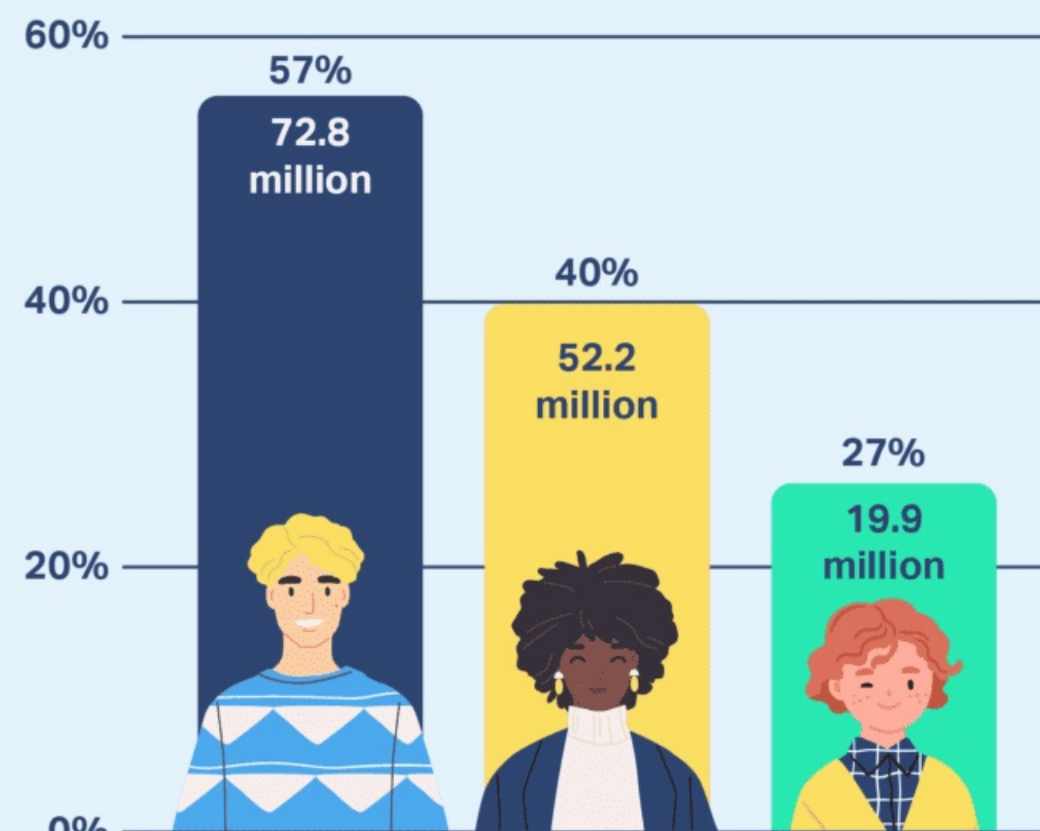

Regular snorers are **5 times** more likely to develop hypertension, heart disease, stroke, **Type 2 diabetes** and high cholesterol than occasional snorers

In **1910** we were sleeping for approximately **9 hours** per night.
In **2018** we sleep for around **6-7 hours**.

More than 1,000 studies of sleep deprivation have been published during the past 100 years

Snoring affects roughly **57% of men**, **40% of women**, and **27% of children** in the U.S.

Based off 2020 census data, that totals approximately **73 million men**, **52 million women**, and **20 million children**.

Snoring in primary school children and domestic environment: a Perth school based study. Respiratory research, 5(1), 19. <https://doi.org/10.1186/1465-9921-5-19>

Why Do People Snore?

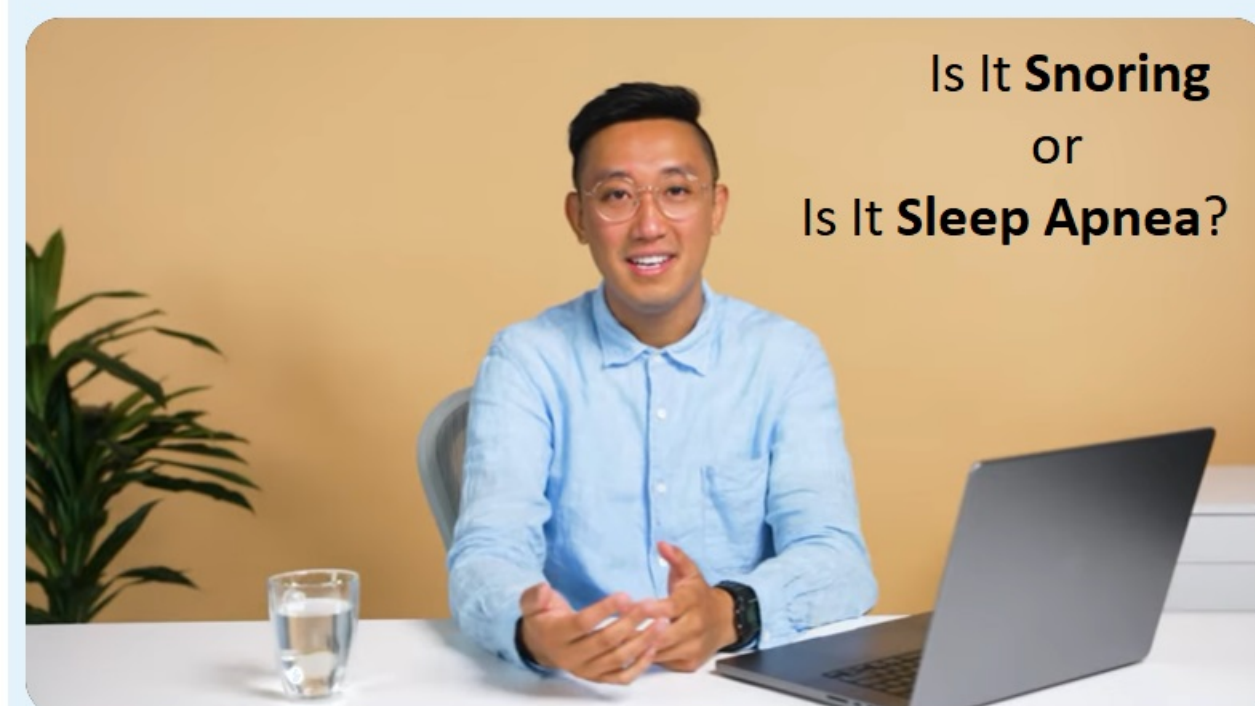

What Causes Snoring in Pregnancy?

What Causes Snoring in Women?

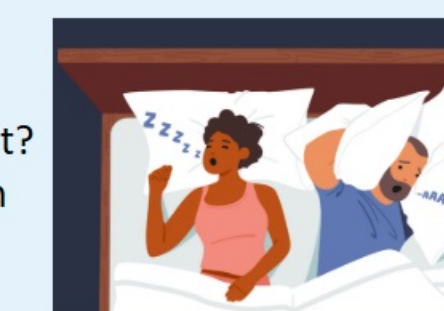

Why Do Children Snore?

Is It Snoring
or
Is It Sleep Apnea?

Watch the video and answer the questions:

- What does the term "Apnea" literally mean according to Dr. Gould?
A) Heavy snoring B) Without breath C) Restless sleep
- Which physical risk factor did Sebastian mention he doesn't have?
A) A thick neck B) High blood pressure C) Narrow nasal passages
- According to the video, how many Americans actually suffer from sleep apnea?
A) 90 million B) 50 million C) 22 million
- Which of these is a symptom of sleep apnea mentioned by the doctor?
A) Vivid nightmares B) Teeth grinding (bruxism) C) Night sweats
- What sound does the doctor say often follows a period of silence in an apnea patient?
A) A whistling noise B) A choking or "gasp" sound C) A high-pitched scream
- What is a potential long-term consequence of untreated sleep apnea?
A) Permanent brain damage B) Total loss of hearing C) Chronic muscle growth

- How would you describe the difference between a "normal" snorer and someone who might have a more serious sleep issue?
- Do you think people who snore should feel responsible for their partner's lack of sleep, or is it just an uncontrollable health matter?
- Many people are afraid to go to a "sleep study" or use medical machines. Why do you think there is a stigma or fear surrounding sleep treatments?
- How does a bad night's sleep affect your mood and productivity the next day? Can you share a specific example?
- What are some common "old wives' tales" or home remedies people use to stop snoring, and do you think any of them actually work?
