

CES 2026 was the world's biggest technology show, held in Las Vegas in January 2026. Thousands of companies gathered to show off new gadgets that will change how we live, work, and play.

Check out some of the most interesting products presented on the show!

Lego Smart Play System: It **triggers** responsive sounds and lights to turn physical building blocks into an interactive "screen-free" experience.

Roborock Saros Rover: It **deploys** articulated legs to scale and vacuum individual stairs autonomously.

Samsung Galaxy Z TriFold: It **expands** into a 10-inch tablet to facilitate massive multitasking across three apps simultaneously.

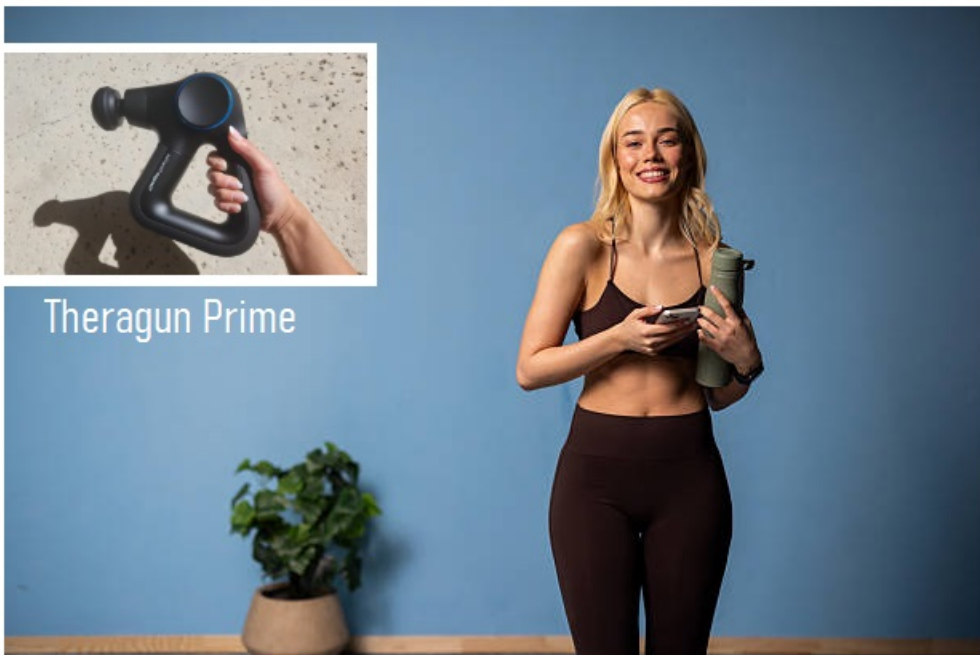

LG CLOiD: It **utilizes** seven-axis robotic arms to **execute** complex household chores like folding laundry and unloading dishwashers.

Razer Project Ava: It **generates** a holographic sprite to **provide** real-time gaming advice and organize your daily schedule.

Viture "The Beast" AR Glasses: It **replaces** traditional monitors to provide a high-fidelity cinematic workspace in a lightweight frame.

"After a long workout, I always use my Theragun Prime. It a_____ deep muscle recovery by using rapid pulses to release tension. I love how it b_____ my flexibility and blood flow so I don't feel sore the next day. It basically c_____ the need for a professional massage therapist every week!"

"I'm obsessed with this little fabric shaver because it d_____ even the smallest pills and fuzz on my sweaters. It e_____ a sharp, rotating blade to safely shave the fabric without causing any damage. It really helps to f_____ waste because I can keep my old clothes looking brand new for years."

"I've started 3D printing as a hobby, and this machine is incredible. Once I send a file, it g_____ precise movements to build complex plastic models layer by layer. The printer h_____ high-quality parts very quickly, and it even i_____ the filament levels to make sure the print doesn't fail midway through."

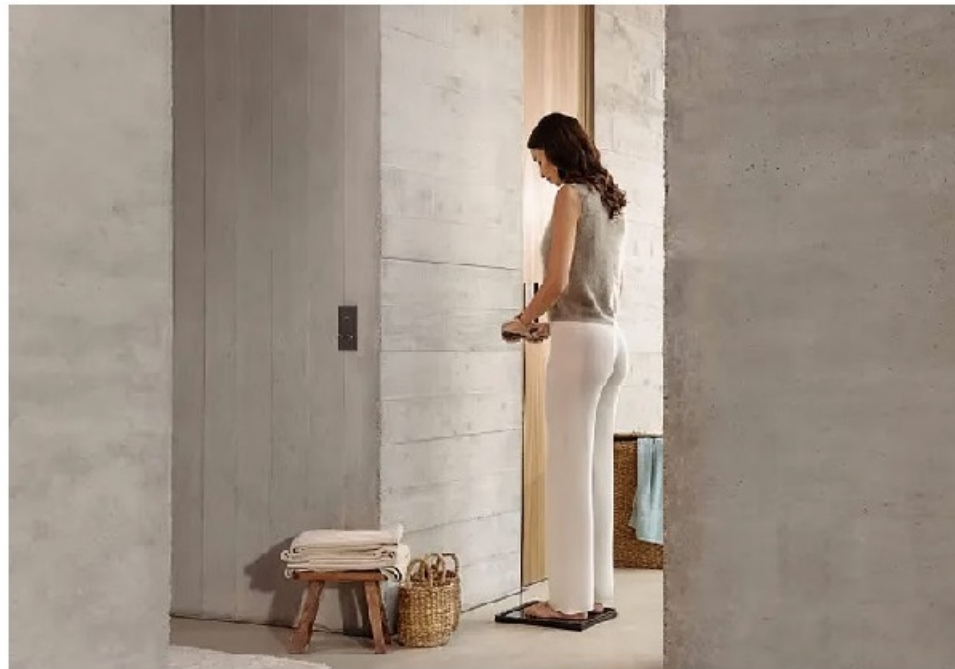

"This speaker is perfect for traveling because it j_____ easily to my backpack with its built-in loop. Even though it is tiny, it k_____ a really loud and clear sound for its size. When I'm outside, it l_____ a special 'Boost' mode to make the music even punchier without draining the battery too fast."

- Do you use any gadgets that improve how you feel after exercise or a long day at work?
- Do you prefer to fix your old items or simply buy new ones?
- What is the first thing you would choose to create if you had a 3D printer?
- What is one portable device you always take with you when you leave the house?

Clicks Communicator: It **attaches** a physical keyboard to modern smartphones to **improve** typing speed and tactile feedback.

Withings Body Scan 2: It **monitors** 60 different biomarkers to **predict** longevity and **detect** early signs of hypertension.

Oshkosh Airport Robots: It **automates** tarmac operations to **minimize** flight delays during extreme weather conditions.

- Which of the products above do you find the most useful in everyday life?
- Which specific gadget are you the most excited to see in a store nearby?
- Which new device may have the potential to change the way you work today?
- Which of these high-tech tools would you like to buy as a gift for a friend?
- Which invention seems like the most creative solution for a common problem?
- Which item on the list looks like it might be too expensive for most people?
- Which piece of technology do you think will be the most popular this year?
- Which of these robots would you trust to help you with chores in your home?
- Which of the fun gadgets would you choose to play with during your free time?
- Which electronic product do you think is the most unnecessary for your life?

Have a look at the **blue** verbs above; they all represent the powerful actions that modern technology can perform. To help you master these terms, try to pair each verb with its correct definition:

- e.g. **generate** To produce or create something, such as an image or power.
- _____ To use machines to do work instead of using human effort.
 - _____ To say that an event will happen in the future using data.
 - _____ To join or fasten one object to another object permanently.
 - _____ To make something become larger in size, area, or amount.
 - _____ To make the quality of something better than it was before.
 - _____ To use something effectively for a particular purpose or job.
 - _____ To reduce something to the smallest possible level or amount.
 - _____ To move a part into a position where it is ready for use.
 - _____ To notice or discover something that is difficult to see.
 - _____ To cause a device to start a specific action or reaction.
 - _____ To give something that is wanted or needed by the person.
 - _____ To watch or check something regularly to see how it changes.
 - _____ To complete a difficult task or a set of complex movements.
 - _____ To take the place of something else that was used before.

1. The Lenovo Cura uses only cloud-based models to catch you up on your missed notifications.
2. The Lenovo Legion Pro rollable concept creates an ultrawide gaming display on a laptop.
3. The ThinkPad X1 Carbon Gen 14 is a modular laptop that allows you to replace individual parts.
4. The Samsung Galaxy Z TriFold features a massive 15-inch display when the device is fully open.
5. The Boston Dynamics Atlas robot is ready to start working at Hyundai car manufacturing plants.
6. The Roborock Saros Rover uses long wheels to roll over high obstacles and clean thick carpets.
7. The Samsung S95H is the first OLED TV that can display artwork from the Samsung art store.
8. The new Samsung S95H TV is exactly 50% brighter than the models released in the previous year.

Think about gadgets you use most often, describe them using the verbs we've learnt so far.
